

IN-4-AHA Final Conference

Boosting the scale-up of digital innovation for Active and Healthy Ageing in Europe

IN-4-AHA comes to an end after working the past two years to support digital innovation for Active and Healthy Ageing in Europe. We have come across several opportunities and challenges related to the current policy landscape and the environment in which European AHA stakeholders operate and cannot wait to share our insights with you during **IN-4-AHA's final conference on 6 and 7 December in Estonia and online!**

On **7 December**, we invite you to join us for our final conference at **Arvo Pärt Centre** in Laulasmaa, Estonia, opened by a welcome message from **Dubravka Šuica**, Vice President for Democracy and Demography, European Commission, and a keynote from the **Estonian Vice-chancellor for Innovation, Nele Labi**.

After an overview of the IN-4-AHA project from Piret Hirv, the Conference will then take you through our work of the past 2 years in three sessions, focusing on the challenges addressed, solutions offered by the IN-4-AHA consortium (e.g., models, analysis, etc.) and related recommendations. The event will end with a panel discussion on the present and future of active and healthy ageing in Europe, followed by a networking reception.

Throughout the day during the different networking breaks, participants will be able to discover more details about the work of IN-4-AHA through a set of roll-up posters summarizing the main activities and products of the consortium. The full agenda can be found below.

This event will be webstreamed on our Final event page
<https://innovation4ageing.tehnpol.ee/final-conference/> and on Facebook
